Honda QC1 - 1.5 kWh battery	**Quotation after battery-condition and technical verification**

3. Commercial Terms

1. Rates apply to intact end-of-life batteries collected through a legally compliant waste-battery channel.
2. Final payment will be based on verified net weight and the physical condition of each battery.
3. Pickup schedule and minimum consolidated quantity will be mutually agreed for the 20 service-centre network.
4. Damaged, burnt, leaking, opened, altered or unidentified batteries are subject to inspection and a separate price.
5. EV batteries require verification of model, chemistry, condition, ownership and EPR/disposal documentation before pricing.
6. Quoted rates may be revised after the validity period based on prevailing scrap-market conditions.
7. Applicable taxes, transport responsibility and payment timeline will be finalized in the work order or collection agreement.
